DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 37 and 39 are rejected under 35 U.S.C. 102(e) as being anticipated by Hamada et al (5,933,791).

Hamada et al teach a nanotube bandgap device having a substrate with an ordered array of nanotubes thereon, the nanotubes having a predetermined position on the substrate, the nanotubes having a predetermined dimension (see column 2, lines 1-7); and wherein the band gap device is responsive to light waves (see column 11, lines 20-33).

Allowable Subject Matter

2. Claims 19-36 are allowed.
3. Claims 38 and 40-43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2821

4. The following is a statement of reasons for the indication of allowable subject matter: The claims are allowable over the art of record because the prior art does not teach a resonant nanotube structure responsive to electromagnetic energy comprising: an ordered array of resonant nanotubes arranged on the substrate.

Response to Arguments

5. Applicant's arguments filed on 6/7/06 have been fully considered but they are not persuasive.

Applicant argues that Hamada et al fail to disclose the nanotubes having a predetermined position on the substrate and the nanotubes having a predetermined dimension. Examiner respectfully disagrees with Applicant's position, Hamada et al teach the nanotubes having a predetermined position on the substrate and the nanotubes having a predetermined dimension (see column 2, lines 1-7, and claims 1-10).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
